

ICLEI's experience and approach in connecting cities-pollution-health

Yunus Arikan

Head of Global Policy and Advocacy

UNEA3 - UN EMG – Dialogue 4

Key Messages

Cities and regions can become pollution-free and healthy, globally, when;

- 1. Policy and practices** are designed on *holistic, integrated, preventive, multi-level, multi-purpose, nature-based, circular, citizen-oriented* approaches, instead of end-of-pipe, treatment/cure-based, silo-thinking, single-purpose, top-down ones;
- 2. Global community and national governments** *build-upon, support, strengthen, replicate, and advance good practices by progressive local and regional governments and their networks*, developed over the years through the innovative implementation and advancement of Agenda 21 and other sustainability practices;
- 3. UN Conventions, programmes and mechanisms** are *redesigned, synergized and reformed* to fit-for the vision of the 2030 Agenda for Sustainable Development and Paris Agreement and seize the opportunities of an Urban World.

Evolution of Framing Conditions

- **Stockholm, 1972** - human environment, including urbanization in the global agenda
- **Vancouver, 1976** - HABITATI
- **Rio, 1992** – Earth Summit, Agenda 21
- **Istanbul, HABITATII, 1996** - Making human settlements safer, healthier and more liveable, equitable, sustainable and productive.
- **SDG11, 2015** - Make cities and human settlements inclusive, safe, resilient and sustainable
- **Paris Climate Agreement, 2015** – engaging all levels of government
- **Quito, HABITATIII, 2016** – the New Urban Agenda
- **UNEA3, 2017** - #BeatPollution, Pollution-Free, healthy cities

Healthy, Happy and Inclusive Communities Agenda

Happy, healthy and inclusive communities look beyond GDP as the primary indicator for development, choosing to prioritize health and happiness for all.

Selected Projects:

[ACCESSanitation - Accelerating City-to-City Exchange for Sustainable Sanitation](#)

[Alcohol Harm Minimization Program](#)

['ALoS' \(Local Agenda for Security\)](#)

[Cities for Safe and Healthy Communities](#)

[“Justapaz” \(Local Agenda for Peace\)](#)

Synergizing Pollution-health

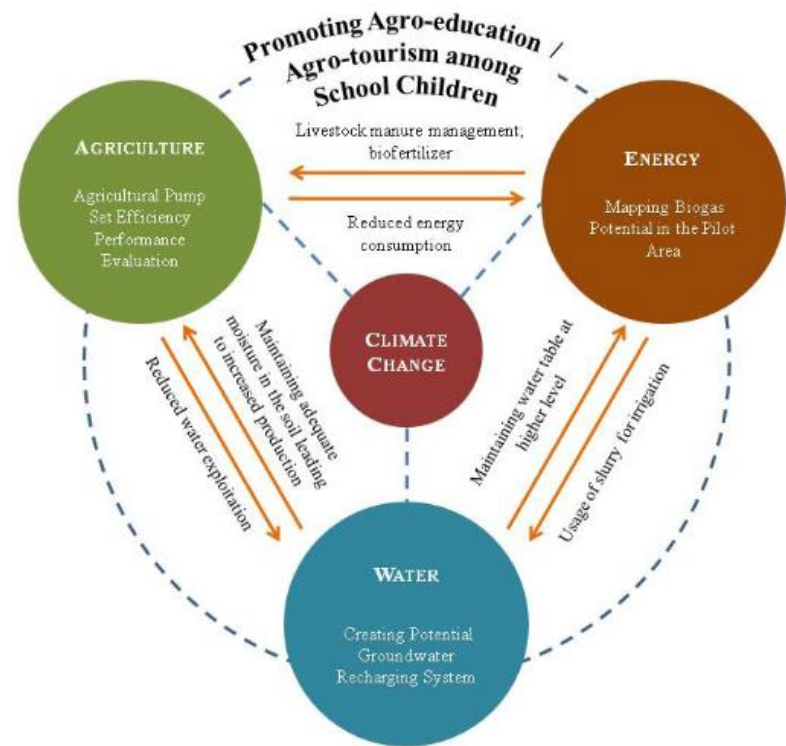

- **Urban Nexus**
- **Climate action**
- **Sustainable public procurement**
- Urban Transitions Alliance - industrial legacy for a sustainable future
- CityFood
- Ecomobility
- Biodivercities
- **East Asia Clean Air Cities Initiative**
- **Climate and Clean Air Coalition – Urban Health Initiative - BreatheLife**

Synergizing Pollution-health: Urban NEXUS

- Curitiba, 1970-1990

- Nashik, 2014

1. URBAN NEXUS OBJECTIVES

Increase the effectiveness, suitability, efficiency and resilience of urban projects and investments.

2. URBAN NEXUS INTEGRATION AREAS

1. Scales
2. Systems & Resources
3. Services & Facilities
4. Silos
5. Social Behaviors

3. URBAN NEXUS DEVELOPMENT CYCLE

- Stage A: Identify
Stage B: Innovate
Stage C: Design & Deliver
Stage D: Capacitate & Communicate
Stage E: Mainstream

4. URBAN NEXUS INNOVATION AREAS

1. Law & Policy
2. Design & Technology
3. Delivery Models
4. Communications & User Behaviors
5. Institutional Development

Synergizing Pollution-health: Climate Action co-benefits

carbon// Climate Registry

The global reporting platform for cities, towns and regions tackling climate change - created to support transparency, accountability and credibility

804

9% of the world population represented

1019

Number of entities registered to the eDR

86

Countries

1909

Climate Targets

7083

Mitigation and Adaptation actions

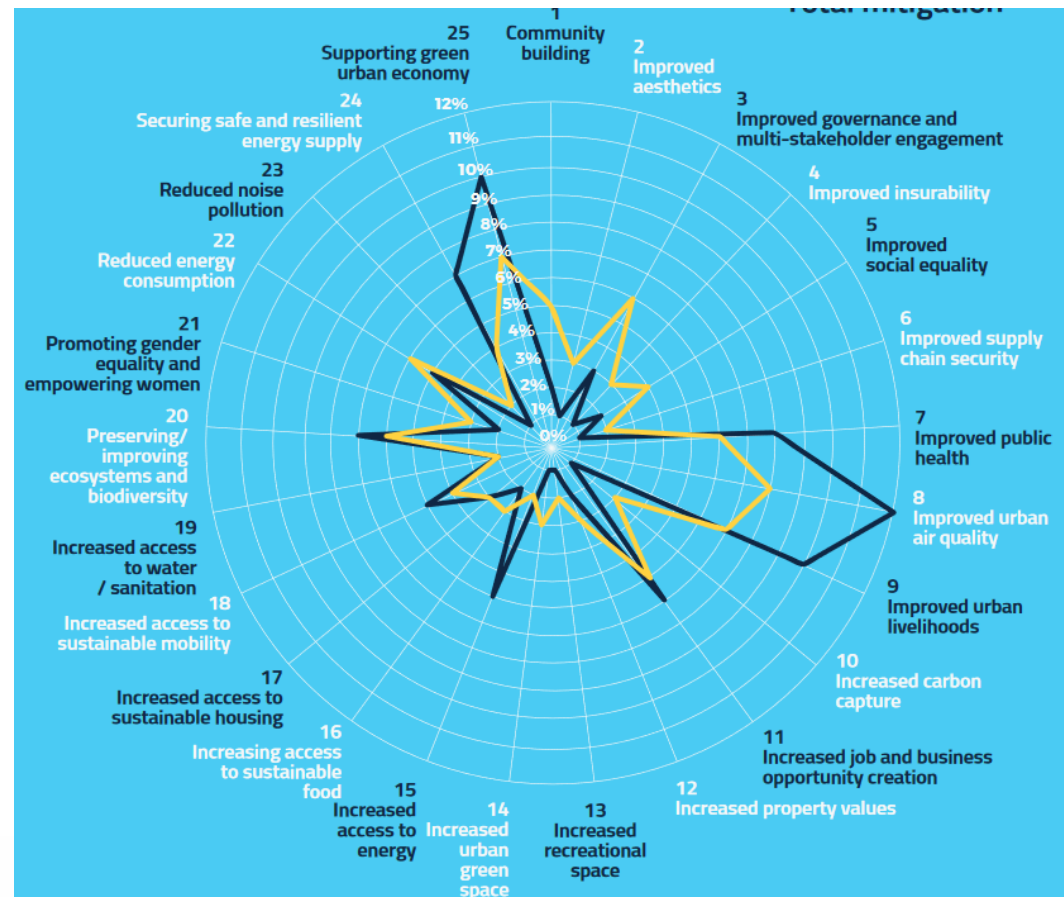

5.6

Committed GHG emission reductions by 2020

26.8

Committed GHG emission reductions by 2050

Synergizing Pollution-health: Sustainable Public Procurement

10YFP SPP Programme

The Sustainable Public Procurement Programme of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns

Source: Baseline Review Report: Measuring and Communicating the Benefits of Sustainable Public Procurement and BuySmart Network's Guide to the Business Case & Benefits of Sustainability Purchasing, March 2007.

Exhibit 13. Potential Benefits of SPP (Partial List)

Environmental Benefits

- Reduced greenhouse gas emissions
- Reduced energy, water, and fuel consumption
- Reduced waste generation
- Improved air quality
- Efficient use of materials
- Reduced use of hazardous substances
- Maintains biodiversity

Social Benefits

- Creates employment opportunities
- Improves occupational health and safety
- Improves social inclusiveness
- Promotes economic opportunity for indigenous people
- Promotes equal opportunity employment
- Promotes fair and ethical trade
- Supports small and medium enterprises

Economic Benefits

- Reduces cost
- Promotes innovation
- Promotes regional economic development
- Develop markets for sustainable products and services
- Grows revenue
- Improves reputation
- Reduces risk

- Reduced initial cost
- Reduced lifecycle costs
- Reduced total cost of ownership
- Reduced operating, maintenance, and replacement costs
- Reduced energy, water, and fuel costs
- Reduced waste disposal costs
- Reduced over-specification
- Reduced compliance costs
- Reduced health and safety costs
- Reduced legal and insurance costs

GHENT Annual increase of 10% in contracts awarded to the social economy sector	HELSINKI By 2020, 100% of procurement processes will integrate sustainability	MONTRÉAL By 2020, 30% of bus fleet to be converted to hybrids
ROTTERDAM By 2030, 40% reduction in energy consumption in municipal buildings	SEOUL By 2017, 40% of selected product purchases to be green	TSHWANE By 2020, 40% of the city bus fleet will be green
WARSAW By 2020, a total of 130 electric buses will be in operation	Check all the targets on the city pages	BUDAPEST By 2020, 100% of the procurement processes will integrate sustainability and green aspects
