Working with SUN

A close-up photograph of a person's hands planting a small green seedling into dark soil. The hands are positioned on the right side of the frame, with the fingers gently holding the stem of the plant. The background is a soft-focus green, suggesting an outdoor setting. The overall tone is positive and hopeful, symbolizing growth and environmental care.

1. Working with SUN is voluntary
2. The UN Climate Neutral goal is already adopted
3. SUN will help you to do the work – not do the work for you.
4. Working with climate neutrality will still require time and resources from your organization
5. SUN is not an audit and not a certification!
6. It is still early dawn but we expect a sunny day!

SUN

Responsibilities and benefits

What you commit to by working with SUN

1. Assign contact person
2. Provide data and access for initial assessment
3. To jointly (with SUN) elaborate a GHG reduction action plan
4. Provide regular reports on implementation of action plan

What SUN commits to you

1. Assist in initial assessment through site visit, expert advice and analysis of data.
2. Help you to develop the GHG reduction action plan
3. To verify and justify requests for funding.
4. To assist in implementation of action plan as is feasible.
5. To provide tools and methodologies, links to experts and service and technology providers.
6. Prepare and make available a web-based know-how sharing facility where resources, case studies and other resources are pooled.

SUN

How to start working together

1. Sign LoA & assign contact person
2. Conduct Initial assessment:
 - a) Data collection
 - b) Site visit
 - c) GHG inventory
3. In-depth analysis of selected areas
4. Develop GHG reduction action plan and present to governing body for approval/funding
5. Implementation of plan and reporting to SUN
6. Prepare for GHG offset purchasing by december 2009
