

# UN Common Approach on Biodiversity

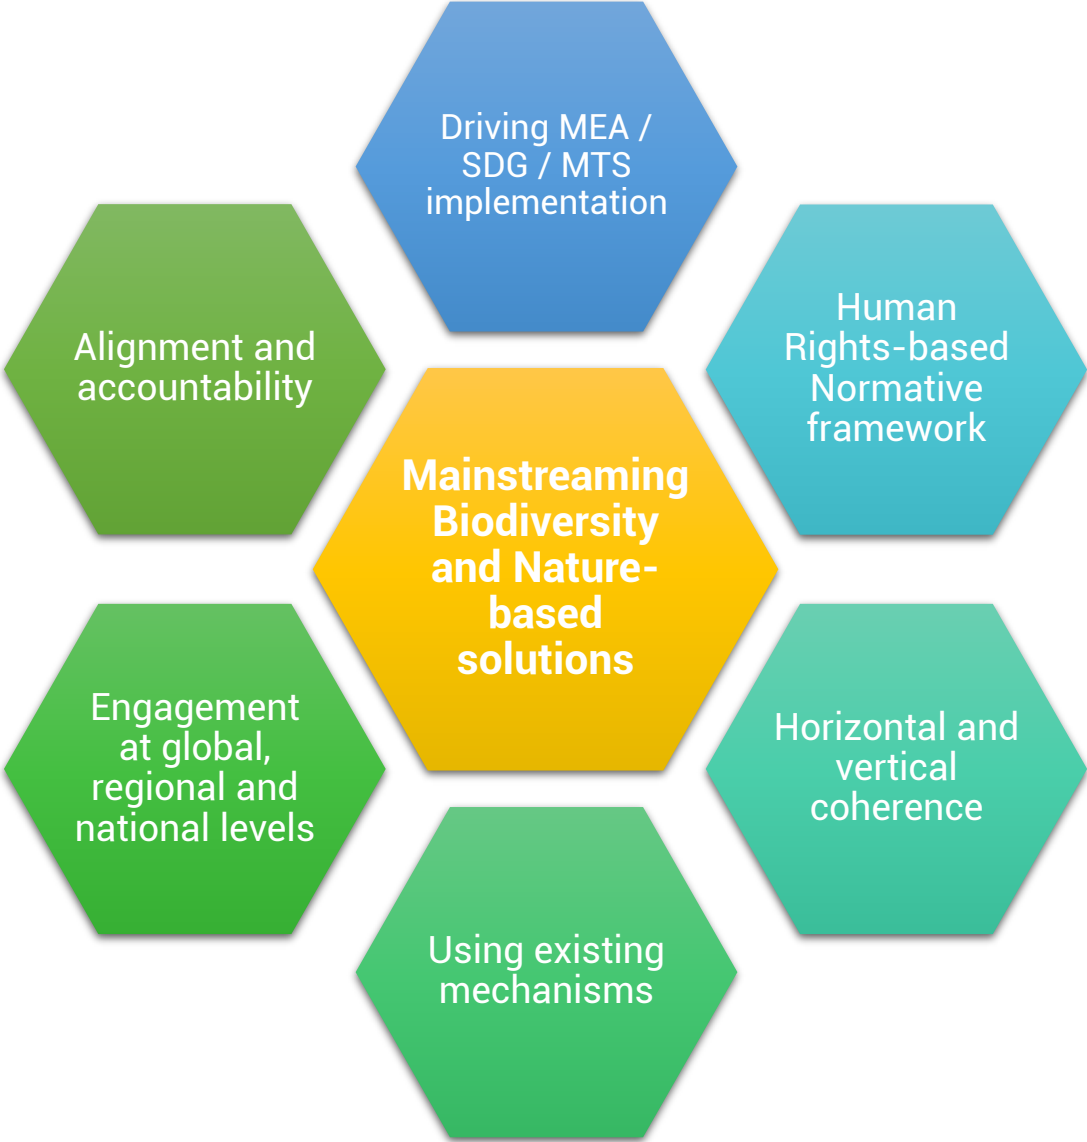

---

Towards the implementation of the UN Common Approach to integrating biodiversity and nature-based solutions for sustainable development into the UN's policy and programme planning and delivery

---

Corli Pretorius  
EMG meeting, 28/04/2021

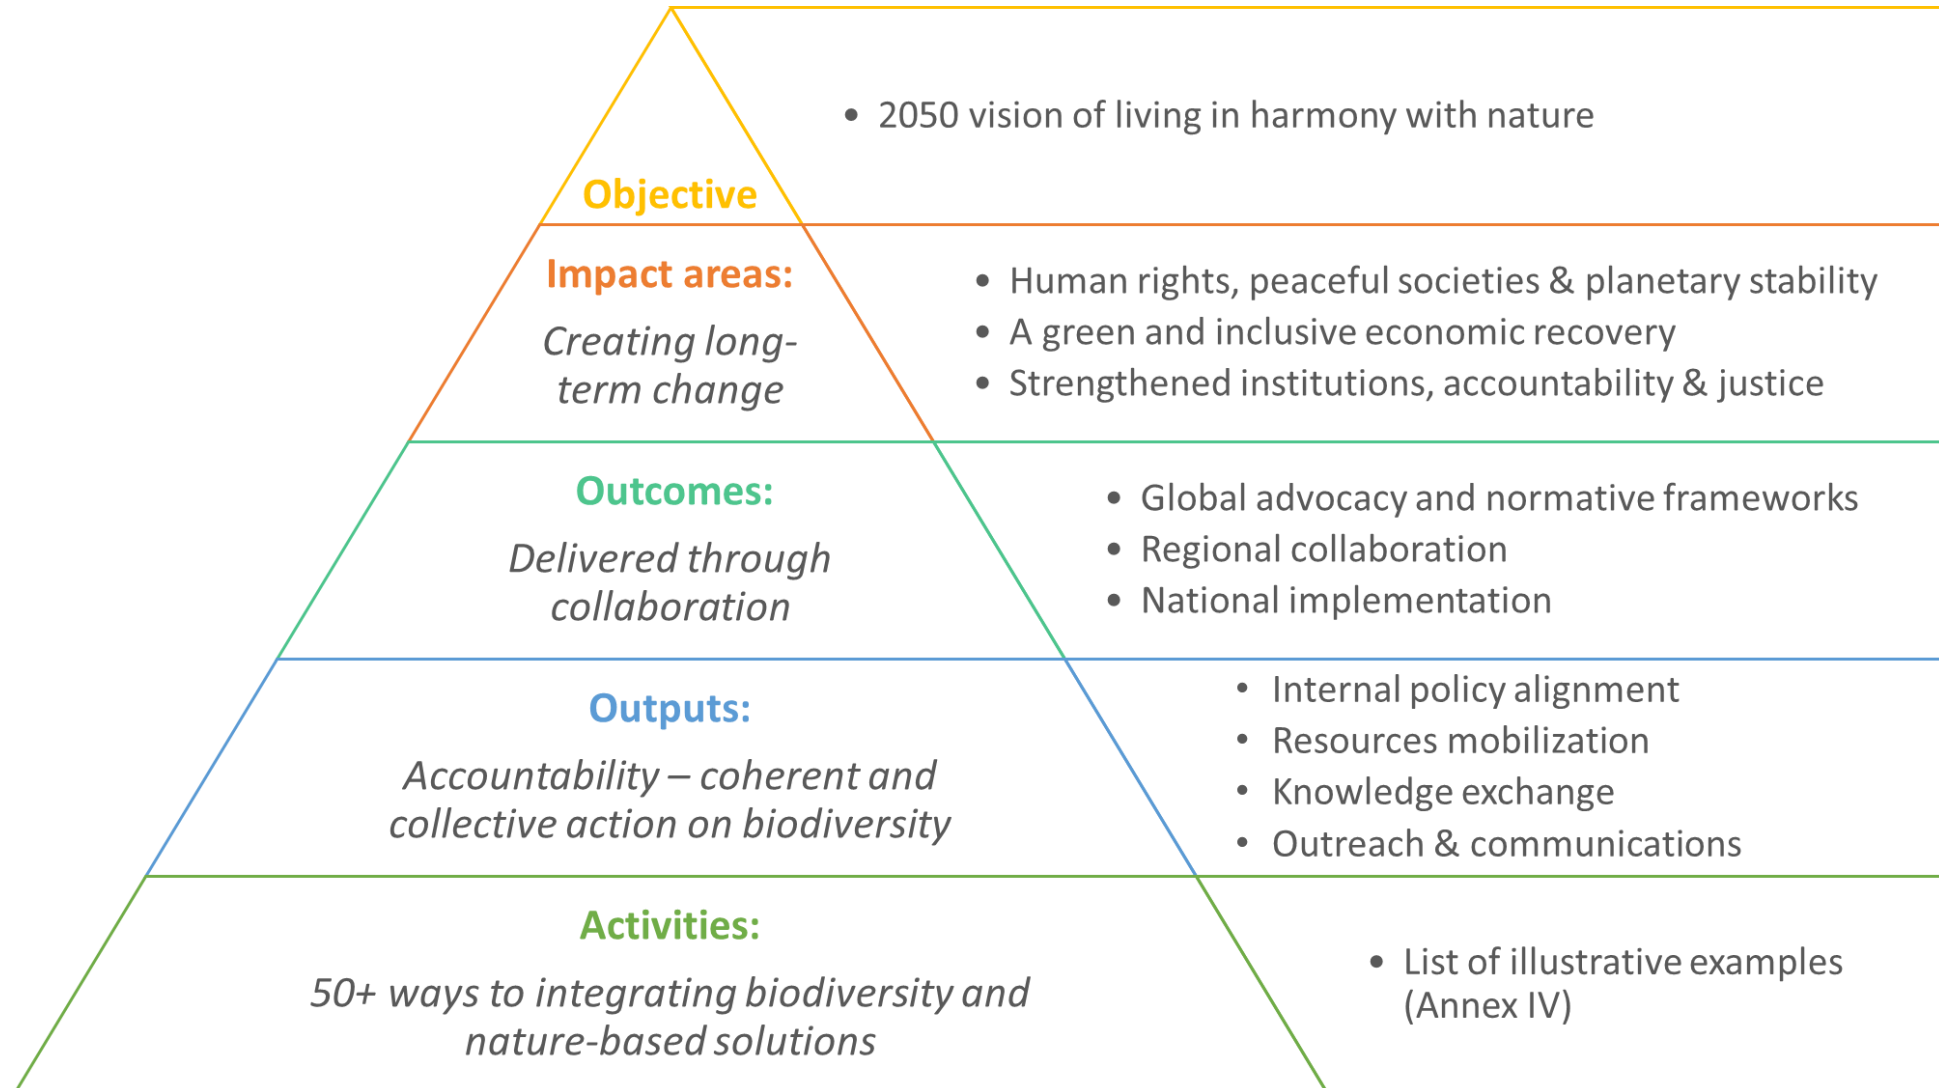

# Strategic Intent

# 3 Impact Areas and 15 Medium-term Objectives

# A results-based structure

# Examples of activities to enable collective action on biodiversity

## Accountability and reporting

- Limited number of measurable targets and related indicators
- UN INFO system and Business Operations Strategy (BOS) and Enterprise Risk Management (ERM) at national and regional level
- UN 2020-2030 Sustainability Strategy Phase II
- Existing UN system reporting mechanisms, Greening the Blue, SUN

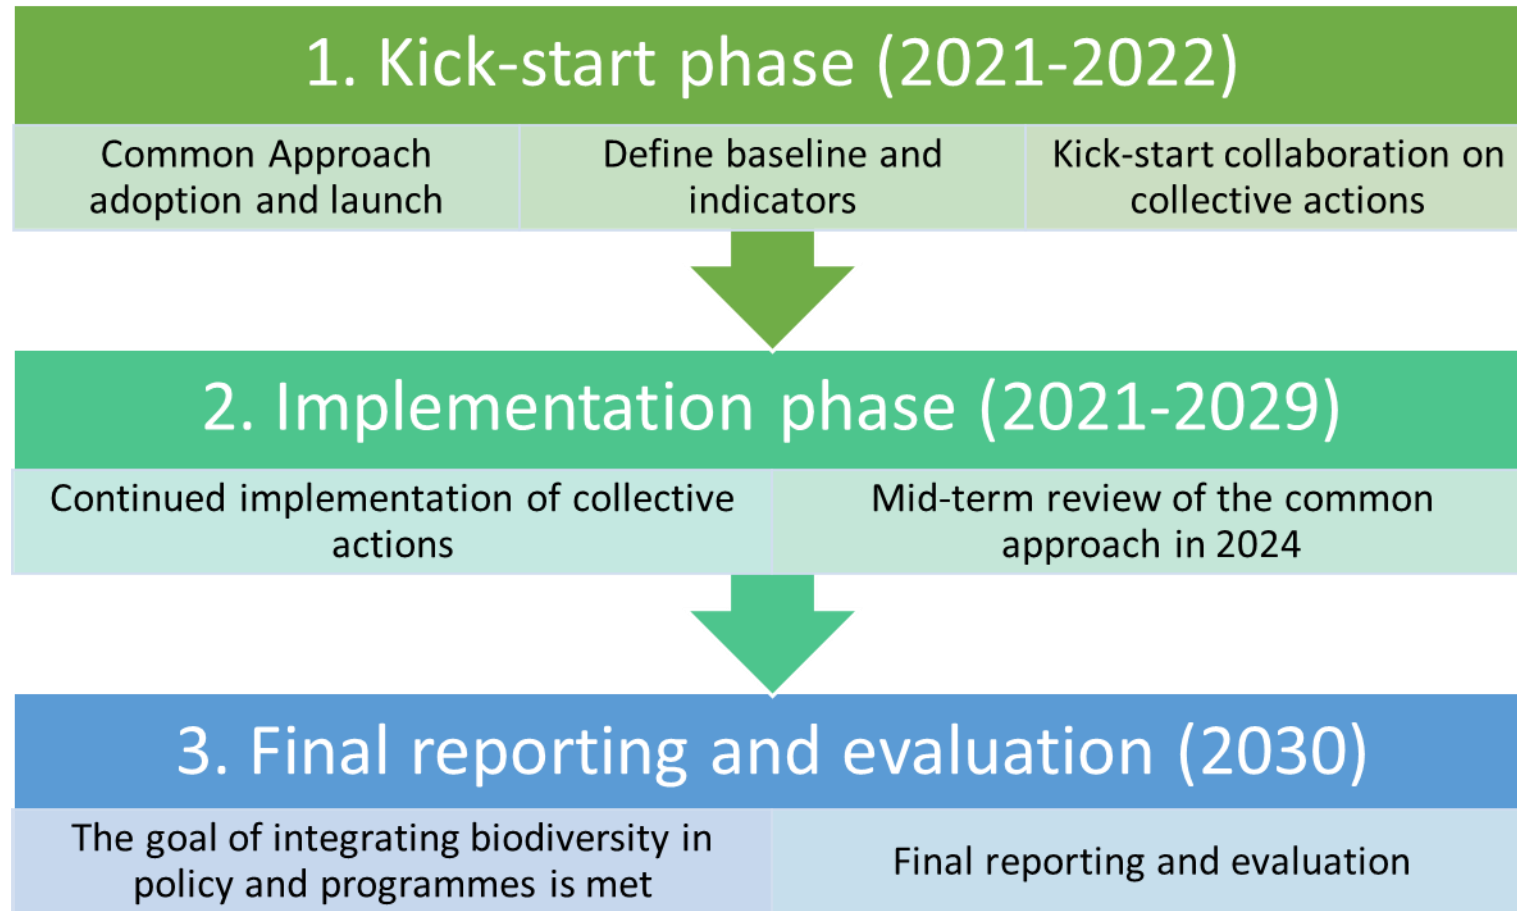

## Training and information sharing

- UN entities can review their current programming and resources
- A series of thematic webinars and training seminars
- Greater engagement with and visibility of biodiversity in existing global coordination mechanisms
- Supporting coherent narratives during the UN Decades

## Knowledge broker and matchmaking

- Leverage UN system data, knowledge and expertise
- Technical support to DCO, UN Resident Coordinators and UNCTs
- Knowledge-sharing via the UN regional mechanisms, notably Regional Collaborative Platforms, Regional Issue-based coalitions and Regional Peer Support Groups

# The common approach implementation timeline

# Thank you
