

IMG on Environmental Sustainability Management

Progress in the reduction of the UN System's Environmental Footprint

- The 2020 Greening the Blue Report published December 2020 with 2019 UN System data.
 - 22% reduction in GHG emissions since 2010
 - 97% of GHG emissions offset
 - The 2021 GtB Report will be published November 2021 in occasion of the UNFCCC COP. Aiming for 100% climate neutrality.
- GtB inventory process underway - aligned with the UN Sustainability Strategy
 - New EMS data collection process
 - New reporting on procurement, staff awareness and usage of renewable energy
- New Greening the Blue environmental training will be available in early fall 2021.
- Fleet management project launched for closer look at impact of UN vehicles and possibilities for improvement
- Reports
 - GHG Science Based Targets Guidance for UN Organisations published
 - Important and Desirable Environmental Actions (IDEAs) for Selection and Establishment of Resilient and Efficient UN Offices report approved by the UN System's Task Team on Common Premises
- Work ongoing with the HLCCM Procurement Network to foster sustainable procurement practices in the UN system.
